

Hello (Earl of March/Sacred Heart),

The Kanata Greenspace Protection Coalition (KGPC) and Carleton University students are teaming up to protect our environment and save our green space.

We are a group of students at Carleton University actively getting involved with our communities for our course Foundations in Community Engagement. We have teamed up with the Kanata Greenspace Protection Coalition to help save the Kanata golf course.

The KGPC is a group of Kanata residents who volunteer to represent the Kanata community. This community organization has done tremendous work fighting to save Kanata's green space. We are writing to you because we believe that we can save our green space with your help and curiosity.

Help Protect Our Greenspace!

The original developer of the Kanata North neighbourhood wanted to create a neighbourhood with lots of green space to attract homebuyers. A plan was proposed to the city of Kanata that allocated 40% of the land to natural environment areas and green spaces. The Kanata Golf and Country Club that exists today make up approximately 30% of the greenspace within this neighbourhood. The Kanata golf course is deeply cherished by all residents of the Kanata North community. It is used for tobogganing, cross-country skiing, and skating in the winter season and golfing in the summer season.

What Is the 40% Agreement?

The 40% Agreement is a legal agreement that protects 40% of a section of Kanata North as greenspace. However, the current golf course owner, ClubLink, wants to destroy the golf course and build 1500 homes. They claim the 40% Agreement is not valid and there is an ongoing legal battle in the courts. The KGPC and the City of Ottawa are fighting to uphold the agreement.

What Can You Do?

Join us in the fight to protect our green space! As a former student of the Stittsville/Kanata high school community, I know that young students have the enthusiasm and capability to create change. We are reaching out to you because we believe that your students can help spread our message and protect our green space. We are asking you to please share this message with your students and encourage

them to follow us on our Instagram @studentssupportingkgpc and check out the official KGPC website: <https://ourkanatagreenspace.ca> for additional information about our cause and how you can make a difference. With your help, we can stop ClubLink from destroying natural green space and keep our neighbourhoods green. For any further questions do not hesitate to reach out to toriellis@cmail.carleton.ca

Hello Carleton University Environment Club,
